Industry News, Manufacturers News

PIX-Harvester® – HXS (Heavy-duty, High-power, Banded Wrap Belts)

Special construction, highly durable, Banded Wrap Belts designed for high tensile strength, high power transmission and compatible with reverse idler.

DUO® – XS (Hexagonal Wrap Belts)

Double-sided V-belts designed for multi-pulley, twin-power frictional drives.

EVENTS

There are no upcoming events at this time.

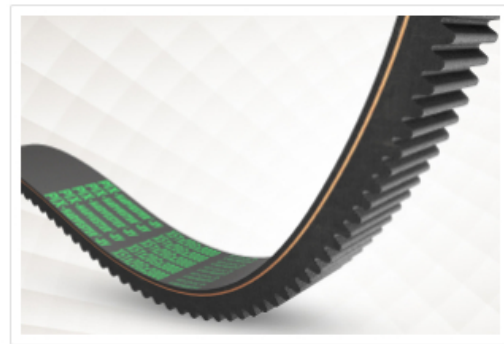

PIX-Harvester® – XS (Agricultural Wrap Belts)

High tensile strength and high wear resistance outer cover. Specially designed for reverse idler applications.

PIX-Enforcer® – XS (High-power, High-strength, Inversely Flexible Wrap Belts)

Best of class Aramid corded Belts specially designed for superior resistance to shock loads and special-woven outer cover fabric for high wear-resistance, flexibility and acute reverse bending drives.

PIX-Harvester® – XV

(Agricultural Moulded Raw Edge Capped Belts)

agricultural, medical, lawn edge, cogged belts,

Special fibre loaded compression compound and cog design for superior power transmission, excellent flexibility and quicker heat dissipation rate in the high-speed variator-drives.

PIX is amongst the most reliable manufacturers in the global Mechanical Power Transmission industry with an extensive range of high-performance V-Belts, Timing and Poly-V belts to suit a wide array of industrial, lawn & garden, agricultural and automotive applications.
